MOTIVATION

MATH 122

FARMAN

5.3: AREA
BETWEEN
TWO CURVES

Say we wanted to find the area between the two curves

$$f(x) = x^2 \text{ and } g(x) = x$$

on the interval $[0, 1]$.

Say we wanted to find the area between the two curves

$$f(x) = x^2 \text{ and } g(x) = x$$

on the interval $[0, 1]$. Geometrically, this is obvious: compute the bigger area, then subtract the smaller area.

Assume that f and g are continuous functions on $[a, b]$ and that $g(x) \leq f(x)$ for all $a \leq x \leq b$. The area between the two curves is

$$\int_a^b f(x) - g(x) dx = \int_a^b f(x) dx - \int_a^b g(x) dx.$$
